PROJECTS

Byte Time

<https://bytetime.netlify.app/>

https://github.com/SheCodesAus/2024_bit_by_bit_frontend

https://github.com/SheCodesAus/2024_bit_by_bit_backend

Byte Time was created as part of the **She Codes Plus** Program. Byte Time is an app that facilitates the onboarding and management process of assigning users to an event based on availability and skill set.

Responsibilities

- Git Manager
 - Supporting the group with all git actions and merge conflicts.
- Front end engineer
 - Coding front end logic.

Relevant Tools

- React JS
- Git
- Python/DRF

Out and About

<https://outnabout.herokuapp.com>

<https://github.com/caoimhejyoti/out-and-about>

Out and About is all about getting outdoors and seeing your local area. Users answer riddles, get quest maps and then go on an adventure. A key goal of this project was to encourage users to exercise and get moving without it being the focus.

Responsibilities

- Database model design
- Researching APIs, creating and rendering of maps.
- Creation of QR Code page and badge rendering
- Design of user reward badges
- Working as part of the team utilising Github projects to systematically resolve development issues.

Relevant Tools

- React JS
- Mapbox API
- Material UI library
- MongoDB/Mongoose
- Apollo/GraphQL
